Hobbies

🏃 ENGLISH
I like learning English. I like traveling, so English is a very useful skill for me. I am also interested in Computer Science, and most of the scientific articles on this science are written in English.

🐱 DANCING
I started dancing a few years ago. I was in a fairly well-known dance team and even danced in the backup of a famous Russian singer.

◎ ARTS
I like Arts in all its forms. Theatres, books, and museums are one of my favotire pastimes. By the way, I graduated from Art school.

◎ MOVIE
Not a single day of my life goes by without watching a movie or a TV-show.

Technical Skills

</> PYTHON
I studied Python for a year. I took the entrance exams using Python. Knowledge at the Junior level. Also I created a chatbot in Telegram using Python

📶 C++
I have been studying C++ at the university for a year now. I successfully complete labaratory works on object-oriented programming.

📖 LINUX
I have been learning how to work in a Linux terminal for a year now. I know the basics and can execute quite a few commands.

Пишем две статьи: про прошедшую неделю и про язык разметки Markdown.

Рис. 3.6: Пишем статью про Markdown

Okay, time for a quick recap of the week that was. Not too
crazy, but definitely had its moments.

Career

This week was all about job hunting. I spent a lot of time
updating my resume, writing cover letters, and scouring
LinkedIn and job boards. It's a bit of a grind, but I
finally sent out a bunch of applications, so fingers
crossed!

Home

Decided to tackle some long-overdue home improvement
projects. I finally got around to organizing my closet (it
was a disaster zone!), and I even managed to assemble that
new bookshelf I bought ages ago. Small victories, but the
apartment feels a lot more organized now.

Learning

I've been trying to learn a new language, and this week I
actually made some progress! I managed to complete a few
lessons on Duolingo and even had a short conversation with
a native speaker online. Still a long way to go, but it's
encouraging to see some improvement.
